

He has the ultimate recipe for safe grilling.

When you have propane, the grilling season never ends. So please remember to follow these safety tips all season long.

- Always follow grill manufacturer's instructions and keep written materials accessible.
- When lighting a grill, keep the top open.
- Always use or store cylinders outdoors in an upright (vertical) position.
- When the cylinder is refilled, have the supplier check for dents, damage, rust, or leaks.
- Before connecting the cylinder to a propane gas grill burner for the first time, use a leak-detection solution (a 50/50 mixture of water and liquid soap) to check connections for tightness. Do not use matches or lighters to check for leaks.
- After filling or exchanging a cylinder, take it home immediately. Keep the vehicle ventilated and the valve closed and capped.
- Do not allow children to tamper with the cylinder or grill.
- Do not smoke while handling a propane cylinder.
- Do not use, store, or transport cylinders near high temperatures (this includes storing spare cylinders near the grill).
- When a grill is not in use, cover disconnected hose-end fittings with plastic bags or protective caps to keep clean.
